Lifetime Window Warranty

The ASSURANCE Plus® Limited Lifetime Warranty applies to any manufacturing defects and/or component failures. As one customer stated, "It's as good as it gets."

ASSURANCE Plus®:

- Covers labor for five years and materials for a lifetime.
- Is transferable to a second owner up to 20 years.
- Features a standard commercial warranty of 20 years.
- Is the best warranty in the business.

Remember, the only reason our warranty can be this good is because of the quality windows it covers.

The American Window Alliance (AWA)

We are a national network of independent manufacturers responding to regional customer demands, using our strength as high-quality, regional window suppliers.

Using the unique talents of each member, the AWA has created the Alliance Window Systems brand. A line of window and door systems that presents customers with the opportunity to obtain the strongest, most attractive products available.

The AWA offers customers the strength of a large national supplier, and the flexibility of a local organization.

Specify Alliance Window Systems Today

Quality materials and exceptional design set Alliance Windows apart from the competition. The value, appearance, convenience, service, security, and peace of mind – combined with our incredible warranty – make Alliance Windows an exceptional investment. Specify Alliance Windows through your contractor or builder.

All Alliance Window products meet American Architectural Manufacturers Association (AAMA) standards and are Energy Star rated.

The American Window Alliance:

The power of a national network, the service of a regional supplier, and the support of local people.

New Construction Vinyl Window Systems

American Window Alliance—Saving Our Planet One Window at a Time

The American Window Alliance (AWA) wants to make the environment in homes as comfortable as possible, and we don't want to destroy the planet's environment doing it.

We are efficiency experts and our efficiency has many benefits. The most important benefit is the energy that will be saved. The technology of our InnovativE® glass – combined with our Duralite® composite warm edge spacer – more effectively seals a home and uses less energy for heating and cooling. The less energy used, the less impact there is on the environment.

Our windows require no maintenance or surface refinishing which eliminates the use of potentially harmful chemicals and sanding for a homeowner – further lessening any impact on the environment.

Imagine every home being wrapped in a nice, warm blanket of Alliance windows!

If we all do our part, you and your clients will have something beautiful to look at through windows manufactured by the AWA.

Lessening Our Carbon Footprint

Alliance windows will have an impact far beyond the rooms where they are installed. Energy-efficient windows guarantee lower energy bills, a lower environmental impact, and most importantly, a greener future.

Homeowners lose a good part of their heating and cooling dollars due to window inefficiencies. Our green windows efficiently insulate their homes, greatly reducing energy consumption, saving money in annual energy costs.

And as important as saving money, more efficient windows also lessen the production of harmful gases such as CO₂. This means savings will be seen well beyond the energy costs. In fact, if every home in America had the technology in the glass systems of our windows, we could save the environment over 56 million tons of CO₂ a year.

Alliance New Construction

Vinyl Windows are specifically designed to meet the discerning needs of architects, builders, homeowners, and the changing needs of the residential building industry. The result is a high-performance series of vinyl windows that feature aesthetically integrated window styles, strength and durability.

Alliance Windows' InnovativE® Energy Management

System is a high performance insulating glass system manufactured to conserve energy and increase comfort in homes, year-round. Our insulated glass system is tailored by each of our seven regional manufacturers for maximum energy efficiency in the climate each serves. Our insulating glass units are specifically engineered to lower energy bills with an added bonus of reducing noise transmission!

Green Is More Than a Color, It's an Obligation.

The AWA is a national network of independent manufacturers responding to regional customer demands, combining our strengths as high-quality, regional window suppliers.

Using the unique talents of each member, the American Window Alliance has created the Alliance Window Systems brand – a line of window and door systems that presents you with the strongest, most attractive products available.

Our goal is to provide you with a quality product while incorporating proven environmentally-friendly materials and practices. The American Window Alliance products provide superior quality, state-of-the-art vinyl window products that are beautifully styled. Dedicated to excellence, our national network of manufacturers combines experience, technology and superior craftsmanship to produce our exceptional product lines. We understand that homeowners demand premier quality vinyl windows that conform to the industry's highest performance standards. Alliance Window Systems' replacement windows series and Windgate® series for new construction represent both

the highest industry standards and our own exacting code of excellence. And, our products are backed with one of the strongest warranties available in the industry today.

Alliance is not just our name. It also accurately describes our approach to doing business, and it's why we can provide such an exceptional warranty on every window we offer.

Proud, independent regional fabricators meticulously craft each of our windows. By linking thoughtfully selected and exceptional fabricators into a national network, or alliance, we are confident of the quality that is designed and built into our windows. So confident, we back our entire product line with an unsurpassed lifetime warranty.

The Power of a National Network, the Service of a Regional Supplier, the Support of Local People!

Innovative[®]

Your Invisible Barrier

When you consider energy efficiency, perhaps the most critical part of any window is the insulating glass system. It only makes sense: the glass has the largest surface area.

Windows Can Help

To understand how windows can help, you must first understand that energy is lost through windows in three major ways: conduction, convection and radiation.

Conduction

The framing of all Windgate windows is made from vinyl, a natural insulator. To prevent energy loss through conduction, all insulated glass units utilize Duralite[®] "warm edge" technology. Using a low-conductance spacer, this method assures maximum resistance to energy flow.

Convection

Energy can also be lost through natural convection currents that can form within the insulating glass. That's why Windgate[®] glass is 3/4" thick, shown by government testing to be the optimum dimension to prevent these convection currents.

Radiation

Radiation occurs when long wave heat energy moves toward cold areas.

The most effective barrier to radiation is an optimal special Low "E" coating, a standard part of our Innovative[®] glass.

This special coating actually reflects the long wave radiation back to its source.

This is important to understand, as radiation affects energy consumption, no matter what part of the country you call home.

Duralite[®]

Solar Gain vs. Heat Loss

The concerns of home owners in the North are quite different than those in the South.

In the North, where heating is a concern, glass must allow maximum solar gain, while preventing heat loss.

CONDENSATION RESISTANCE

No spacer system can eliminate condensation, but Duralite[®] reduces conductivity by 50% over other warm edge spacers. Reducing conductivity also reduces condensation.

Conversely, Southern home owners are concerned with unwanted solar heat gain, when long wave radiation raises cooling costs.

When you understand these regional differences, it makes sense that the insulating glass system should be manufactured to address those concerns.

That's why Windgate[®] Innovative[®] glass systems are tailored by each regional manufacturer for maximum energy efficiency in the climates each serves.

We produce each of our insulating glass units to be specifically engineered to lower your energy bills, and reduce noise transmission.

What's Your Style?

No matter what style home you have, or what style window you want, Windgate[®] can fill your request.

And, since all Windgate[®] windows are made to your specific dimensions, you know you'll get a window that not only fits your style, but fits your home as well.

Anatomy of Efficiency

Energy efficient Windgate[®] windows provide an effective barrier to any weather condition.

Heavy gauge vinyl frame extrusion for strength & durability

Dual layers of wool pile weather stripping.

3/4" Insulating glass, choose our InnovativeE® for the most energy efficient glazing option.

Die-cast cam lock and keeper

Single-Hung

Deep pocketed head with compression seal weather strip

3/4" insulated glass with Duralite® warm edge technology

Top & bottom sash interlock at meeting rails for added security and to minimize air infiltration

Integral finger lift on top and bottom sash for ease of operation

Top and bottom sash tilt in for easy cleaning

Double-Hung

Look for the ENERGY STAR label on qualified products.

The Power of a National Network, the Service of a Regional Supplier, the Support of Local People!

- ❶ Double-wall, integral “J” channel: Designed into the frame, eliminating the cost of an add-on “J” channel while providing a pleasing “beveled” exterior look.
- ❷ Heavy walled PVC framing acts as a natural insulator.
- ❸ Dead air spaces within the frame and sash profiles further resist energy flow.
- ❹ Closed cell compression seal at sloped sill resists air and water penetration.
- ❺ Triple-fin seal weather stripping at sill further reduces air infiltration.
- ❻ 3/4” Insulating glass provides optimum energy efficiency.
- ❼ “Warm edge” low conductance spacer resists energy flow through the edge of glass.
- ❽ Water management grooves channel moisture away from insulated glass sealant.
- ❾ Dual hollows at lift rail add strength and insulation.
- ❿ Optional Innovative® High Performance Glass utilizes Low E coating specifically engineered for local requirements.
- ⓫ Direct set back bedding bonds glass to sash, reducing air and water infiltration potential.
- ⓬ Rigid screen pocket on sill reduces “screen rattle,” even on windy days.

Casements/Awnings

- Sash opens completely, so windows can be cleaned easily from inside your home*
- All components are corrosion resistant, providing years of trouble-free performance
- Multi-Point locking system locks sash at multiple points for utmost security
- Three layers of weather stripping assure effective barrier to air and water penetration
- Optional in some regions, multiple units made with single frame construction

Fixed Units

- Mulling system allows fixed units to be mullied to any other window
- Equal sight lines assure uniform exterior appearance of all units

* Does not apply to egress hardware.

Sliders

- Heavy duty brass rollers assure effortless sash travel
- Roller housing transfers weight of glass directly to frame, reducing stress on sash members
- Independent weep chambers on frame assure effective water runoff
- Stylish beveled exterior matches look of double-hung and casement, to provide a uniform exterior appearance

Innovative[®]
ENERGY MANAGEMENT SYSTEM

New Construction Vinyl Window Systems

Beauty Becomes The Home

Home owners all agree that natural light "lights up one's life." The Alliance vinyl sliding patio door does just that, with a statement of beauty and the confidence of security.

The Alliance door was designed with maximum glass area to capture the light, while conquering the elements. Through modern, computer-aided design engineering, the door possesses exceptional strength while minimizing frame area. Fusion welded corners keep the sash panels straight and true.

Doors see much more operational use over their lifetime than windows. The Alliance patio door's "easy touch" operation allows movable panels to glide smoothly with minimum effort. The panels lock simply and securely with the highest quality hardware.

Standard Door Features:

- 3/4-inch Insulating glass with an overall frame depth of 4-3/16".
- U Value of 0.27, SHGC of 0.30 with InnovativE® (Low E) coating.
- Single point locking hardware.
- Color matched baked enamel designer handle in white or tan.
- Low-rise sill designed to minimize tripping while keeping water out.
- Heavy-duty extruded screen with easy rolling, no-jump action and adjustable steel rollers for smooth operation.
- Four maintenance free heavy-duty steel rollers.

Standard Colors:

Exterior: White, Tan, Clay, Ivory Cream, Dark Bronze, Terra Bronze, Royal Brown, Forest Green and Black.

Interior: White, Tan, Light Oak, Dark Oak, Cherry, and Black Laminate.

Ask your dealer to view actual samples.

Optional Features:

- Beautiful Brass, Brushed Nickel or Faux Oil Rubbed Bronze keyed or non-keyed handle.
- Two point keyed or non-keyed locking system for greater security (highest security rating based on forced entry test-1000 lbs.).
- Foot lock for added security.
- Foam in the frame.

Standard Sizes Available:

(Illustrations show doors as viewed from outside.)

Standard 2-Lite
Rough Opening

60" x 80"
72" x 80"
72" x 83"
72" x 96"
78" x 80"
78" x 83"
96" x 80"

Standard 3-Lite
Rough Opening

108" x 80"
108" x 83"

High-Performance Windows

Windgate New Construction windows are specifically designed to meet the discerning needs of architects, builders, homeowners, and the changing needs of the residential building industry. The result is a high-performance series of vinyl windows that feature aesthetically integrated window styles, strength and durability.

All Windgate New Construction Windows Feature:

- Highest quality vinyl for a lifetime of trouble-free performance.
- Full 3-1/4" jamb depth chambered frame for maximum structural integrity.
- Fusion-welded frames and sashes for extra strength and durability.
- 3/4" Insulated glass for superior thermal performance.
- Optional InnovativE® (Low E) coating system with Warm Edge spacer technology, reduces energy costs.

Windgate New Construction Window Systems

- Single-hung, double-hung, slider, and fixed windows come with a double-wall, integral "J" channel designed into the frame, *eliminating the cost of an add-on "J" channel while providing a pleasing "beveled" exterior look.*
- Slider models feature a lift-out sash with heavy-duty brass rollers, *allowing for even large sashes to glide easily without tipping or sticking.*
- Casements feature sashes that open completely, windows can be cleaned easily from inside your home. Multi-point locking system locks sash at multiple points, for the utmost security.
- Companion awning models available.
- Full range of geometric shapes and transoms provide a wide range of architectural choices.
- Available in Colonial, prairie and custom grid patterns with flat or contour shaped muntin bars.

Window Features	Poor Solution	Minimum Solution	Optimum Solution
Interlocking Sash	No weather stripping or interlock at meeting rail	Weather stripping at meeting rail, no interlock	Weather stripped interlocking sashes
Glass Package	Single glazed, possibly with storm windows	1/2" Clear insulating glass, inefficient metal spacer	3/4" InnovativE®, warm edge non-conductive spacer
Glass Spacer	None	Heat conductive metal	Duralife® composite
Locks/Keepers	Single "sweep arm" lock,	Pop-riveted "sweep arm" keeper is part of frame to rail	Screwed in "Cam-Action" lock, keeper attached to rail
Double-Hung Vent Stop	None	Single "pry out"	Spring Loaded
Frame/Sash Material	Screwed together wood or aluminum	Screwed together vinyl or clad wood	Fusion-welded vinyl for maximum strength and integrity
Warranty	None or limited	20 years, but for parts only	Lifetime, with initial coverage for labor

Prairie Style Grid Pattern

Colonial Style Grid Pattern

A full array of custom grid patterns are available. Please consult with your local Alliance representative.

Windgate®

Lifetime Warranty

Alliance is not just our name. It also accurately describes our approach to doing business, and it's why we can provide such an exceptional warranty on every window we offer for your consideration. A proud, independent regional fabricator of excellent experience and reputation meticulously crafts each of our windows. By linking these carefully selected and exceptional fabricators into a national network, or alliance, we are able to be so confident of the quality that is designed and built into our windows that we can back our entire product line with an unsurpassed warranty.

Of course, other window companies may also say they offer a warranty, but we urge you to carefully read their fine print. They may, for example, guarantee the vinyl extrusion, but what about all the moving parts or the insulated glass? The Alliance Assurance Plus® Limited Lifetime Warranty covers it all – for life! Even more remarkable, if a factory defect needs repair within the first five years, we will even provide the labor required.

Many windows leave you wide open to unpleasant surprises. Select a window from Alliance Window Systems and you'll know it's backed by a warranty second to none.
